Certificate of Owner
Drainage Infrastructure/Green Stormwater Practice

The undersigned certifies to be the owner of the real property for which a building permit application has been submitted to the City of Fayetteville, Arkansas. I certify that the required drainage infrastructure, also referred to as green stormwater practices, to be installed as a portion of the project will meet or exceed the City of Fayetteville requirements. Further, I acknowledge that I am responsible for the required operation and maintenance of the infrastructure such that it continues to function as originally designed in perpetuity in order to maintain compliance with the City of Fayetteville Uniform Development Code. If I sell or convey the property to another owner, I acknowledge that I am responsible for notifying the new owner of these requirements.

I understand that all inspections by City Inspectors will be made only to determine compliance with approved construction documents, construction codes and ordinances and not to assist the owner in properly locating the drainage infrastructure. I acknowledge my responsibility to insure by survey, if necessary, that the location of the drainage infrastructure will conform to the approved construction documents, will meet all setback requirements of the Unified Development Code and will not encroach on any public utility easement. I also certify that the submitted information on the Building Permit Application and all associated forms, site and grading plans are true and accurate to the best of my knowledge.
